MD THESIS

Investigations of Cell Surface Oligosaccharides in Normal Vulval Epithelium and in Preinvasive/Invasive Vulval Lesions
University of Newcastle-upon-Tyne
Awarded June 1997.

The above research and thesis were based on immuno-histochemical techniques to identify specific cell surface carbohydrate constituents including L-fucose and N-acetyl-galactosamine, which appear to be important in the cellular patho-physiology of lympho-vascular invasion and metastases.

Funding for the research was obtained from the “Northern Cancer Care & Research Society”. The research post offered a wide range of training in research methods, study design, laboratory techniques, statistical analysis, and greatly enhanced my own personal knowledge of the science directly related to oncological patho-physiology.

RESEARCH GRANTS

- Investigations of Cell Surface Glycoconjugates in Pre-invasive & Invasive Vulval Lesions.
Northern Cancer Care and Research Society.
Principal Investigator
Awarded £5,000
- A “one-stop” colposcopy clinic for the management of women with low grade smear abnormalities.
Northern Cancer Care and Research Society.
Principal Investigator
Awarded £25,000
- An RCT comparing supra-pubic catheterisation and intermittent self catheterisation following radical hysterectomy.
NHS R&D
Principal Investigator
Awarded £23,500.
- An RCT of follow-up after treatment of ovarian cancer.
NHS R&D
Principal Investigator
Awarded £62,000
- An RCT on quality of life issues including bowel and bladder function between the radical abdominal hysterectomy and the Coelio-Shauta procedure.
NHS R&D
Principal Investigator
Awarded £33,000
- A phase I/II trial of indole-3-carbinol in the treatment of vulvar intraepithelial neoplasia.
NHS R&D
Principal Investigator
Awarded £10,000.
- Investigations into the prognostic value of haemoglobin during primary treatment for ovarian cancer.

Ortho-Biotec
Principal Investigator
Awarded £10,000

- Assessment of nutritional status in women at presentation with ovarian cancer.
NHS R&D
Principal Investigator
Awarded £12,000.
- Investigation of FGF receptors in ovarian cancer.
NHS R&D / NICR
Principal Investigator
Awarded £53,500.
- Investigation of anti-folate receptors in ovarian cancer
NHS R&D / NICR
Assistant Investigator
Awarded £28,000
- NHS Cochrane Collaborative Programme Grant Scheme
Dept of Health
Co-investigator
Awarded £337,000
- NHS Cochrane Collaborative Programme Grant Scheme
